Graded Project (Week 2)

#Problem Statement

Leader Dashboard is an online application to manage tasks.

User Stories
1. As a user I should be able to create my Dashboard.
2. As a user I should be able to Add Project in the dashboard
3. As a user I should be able to add Milestones in each project delivery stages (started, in progress, completed)
4. In each Milestone the end date and assignment to is also specified.
5. Assigned to should be a valid user from json data
6. Milestone can be arranged in their completion stage or completion date

Instructions: -
1. Use json file to handle the data specific work
2. Please host data.json onto the json-server
3. Please use proper component structure to solve the given problem
4. Please upload the folder on Olympus Data.json

```json
        "TL": "Ankit Gupta",
        "assignedTo":"Deepika Mittal"

   }],
   "Users":[
       {
           "id":1,
           "name":"Ankit Gupta",
           "email":"ankit@gmail.com",
           "password":"ankit@123!"
       },
       {

           "id":2,
           "name":"Deepike Mittal",
           "email":"deepika@gmail.com",
           "password":"deepika@123!"

       }
   ]
}
```

Output

Leading Board

Project Name:- Git Management

Started

Adding Database
Assigned to :- Ankit

Design the Application
User Service
Assigned to :deepika
